

THE 14TH IEEE SENSOR ARRAY AND MULTICHANNEL SIGNAL PROCESSING WORKSHOP

July 13-16, 2026 Shenzhen, China

<https://attend.ieee.org/sam-2026>

Welcome Message

On behalf of the Organizing Committee, we are delighted to welcome you to the 14th IEEE Sensor Array and Multichannel Signal Processing (SAM) Workshop in Shenzhen, China.

The IEEE SAM Workshop is a premier event of the IEEE Signal Processing Society, providing a vibrant forum for researchers, industry professionals, and practitioners to exchange innovative ideas and foster scientific and industrial collaborations in sensor arrays, multichannel signal processing, sensing technologies, and wireless communication networks. This year's program features six plenary talks delivered by internationally recognized leaders in the field, six in-depth tutorials, and a rich technical program comprising oral and poster sessions presenting approximately 190 high-quality research papers from around the world.

We are especially pleased to host SAM 2026 in Shenzhen, widely regarded as the "Silicon Valley of China." As one of the world's most dynamic and innovative cities, Shenzhen has transformed from a small fishing town into a global center for technology, entrepreneurship, and advanced manufacturing in just a few decades. Home to many leading high-tech companies, research institutes, and start-up incubators, the city embodies a spirit of creativity, openness, and rapid innovation that resonates strongly with the mission of the SAM community.

Beyond its technological achievements, Shenzhen is also renowned for its youthful energy, modern urban landscape, and exceptional quality of life. Located along the southern coast of China and neighboring Hong Kong, the city offers a unique blend of international outlook and cultural diversity. Visitors can enjoy Shenzhen's beautiful parks, scenic coastline, vibrant arts and culinary scenes, and nearby natural attractions that provide a refreshing contrast to its fast-paced innovation ecosystem. We hope your time here will be both professionally rewarding and personally memorable.

We would like to express our sincere gratitude to everyone who contributed to making SAM 2026 possible and successful, including the organizing committee, technical chairs, technical program committee members, special session organizers, plenary and tutorial speakers, reviewers, volunteers, and especially the contributing authors for sharing their latest research and insights. Finally, we extend our heartfelt appreciation to our sponsors and partners for their generous support.

We wish you an inspiring, productive, and enjoyable stay at SAM 2026 in Shenzhen.

Martin Haardt, Dominic Ho, Lei Huang

Organizing Committee

General Chairs

Martin Haardt, Ilmenau University of Technology, Germany
Dominic K. C. Ho, University of Missouri, USA
Lei Huang, Shenzhen University, China

Technical Chairs

Bin Liao, Shenzhen University, China
Gang Wang, Ningbo University, China

Plenary Chair

Yingbo Hua, University of California, Riverside, USA

Special-Session Chairs

Jun Fang, UESTC, China
Nobutaka Ono, Tokyo Metropolitan University, Japan

Tutorial Chairs

Feng Yin, CUHK (Shenzhen), China
Wee Peng Tay, Nanyang Technological University, Singapore

Finance Chairs

Xinzhu Chen, Shenzhen University, China
Xiaopeng Li, Shenzhen University, China

Publicity Chairs

Lan Du, Xidian University, China
Zhiguo Shi, Zhejiang University, China

Student and Young Professional Chairs

Qian He, UESTC, China
Wei Liu, Hong Kong Polytechnic University, Hong Kong

Industry and Exhibition Chairs

Shuwen Xu, Xidian University, China
Peichang Zhang, Shenzhen University, China

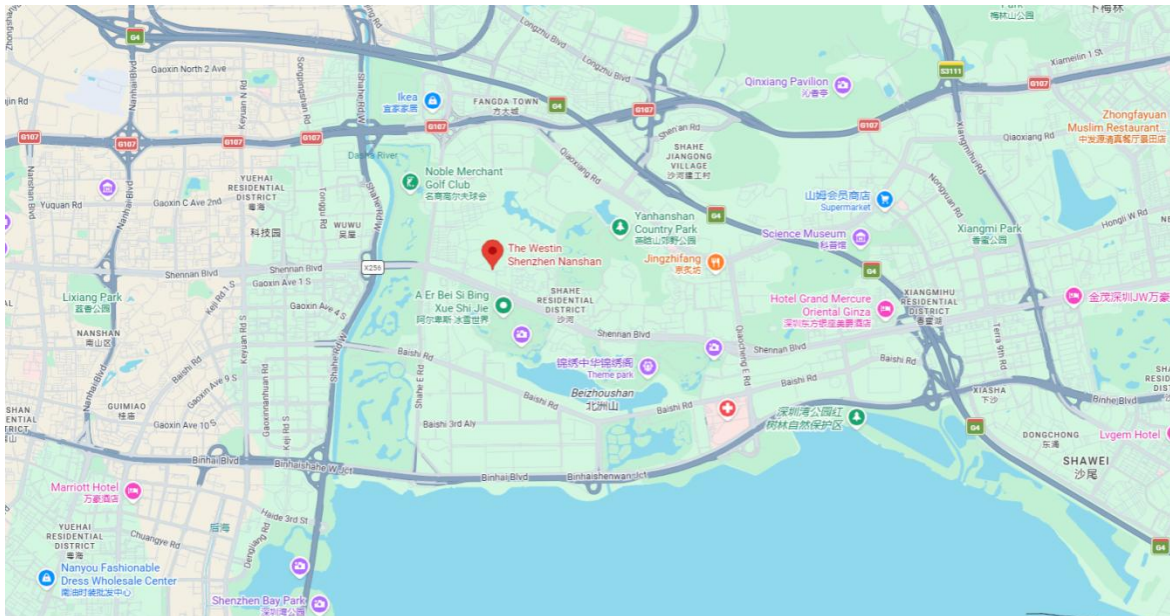

Publication Chair

Jun Liu, USTC, China

Local-Arrangement Chair

Sijia Lai, Shenzhen University, China

Locations

The Westin Shenzhen Nanshan

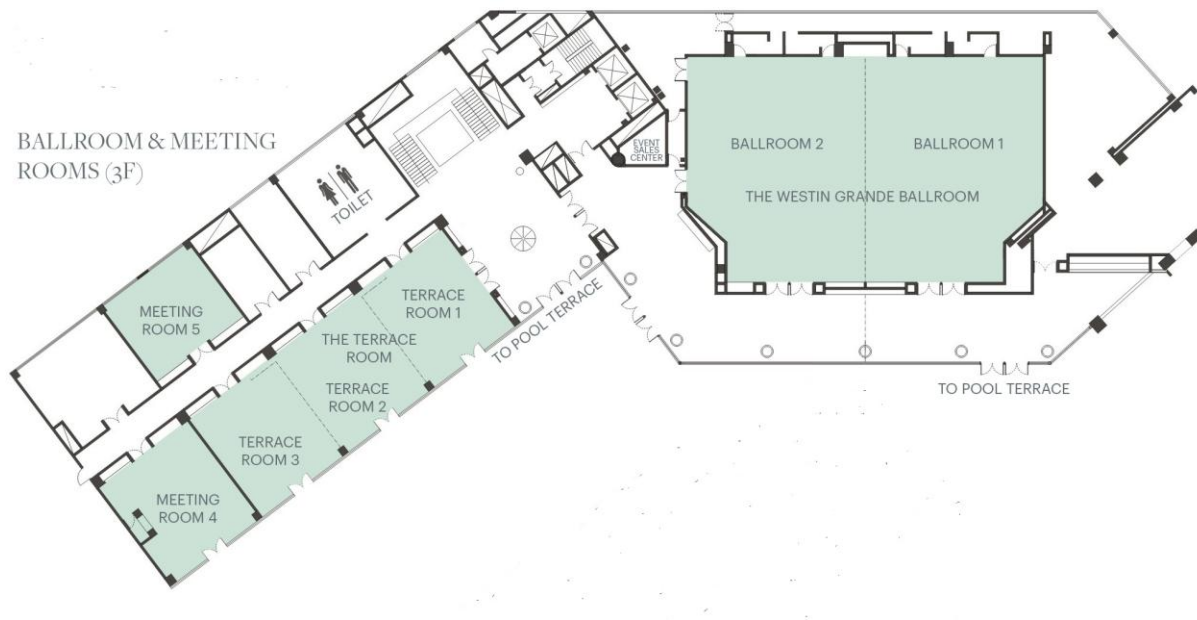

9028-2 Shennan Road, Nanshan District, Shenzhen, Guangdong, China, 518053

Tel: +86 755-26988888

Program Schedule

Monday 07/13		Tuesday 07/14		Wednesday 07/15	Thursday 07/16
08:30-11:30	Tutorials 1 & 2	08:30-09:00	Opening Ceremony		
		09:00-10:00	Plenary 1	Plenary 3	Plenary 5
		10:00-10:15	Tea/Coffee	Tea/Coffee	Tea/Coffee
		10:15-12:15	L1-1 Reg. Session	L2-1 Reg. Session	L3-1 Reg. Session
11:30-13:00	Lunch		L1-2 Reg. Session	L2-2 Reg. Session	L3-2 Reg. Session
			L1-3 Spec. Session	L2-3 Spec. Session	L3-3 Spec. Session
13:00-16:00	Tutorials 3 & 4	12:15-14:00	Lunch	Lunch	Lunch
14:00-16:00	Best Student Papers, Poster	14:00-15:00	Plenary 2	Plenary 4	Plenary 6
		15:00-16:30	P1-1 – P1-4 Reg. & Spec.	P2-1 – P2-4 Reg. & Spec.	P3-1 – P3-4 Reg. & Spec.
		15:00-16:30	Tea/Coffee	Tea/Coffee	Tea/Coffee
16:00-19:00	Tutorials 5 & 6	16:30-18:30	L1-4 Reg. Session	L2-4 Reg. Session	Closing Ceremony
			L1-5 Spec. Session	L2-5 Reg. Session	
			L1-6 Spec. Session	L2-6 Spec. Session	
19:00-	Welcome Reception	18:45-		Conference Banquet	

Floor Plan

- Registration desk is in the area between the Terrace Rooms and the Grande Ballroom
- Welcome Reception (with Workshop registrations excluding Tutorial only registrations) is in the Pool Terrace
- Banquet (with full registrations) is in the Grande Ballroom
- Tutorials are in the Terrace Rooms
- Opening and Closing Ceremonies are in the Grande Ballroom
- Plenary Sessions are in the Grande Ballroom
- Lecture Sessions are in the Grande Ballroom and the Terrace Rooms
- Poster Sessions are in the Hallway Area outside the Grande Ballroom

Plenaries

P1 – Near-Field Beamfocusing: From Theory to Practice

Prof. Emil Björnson, KTH Royal Institute of Technology, Sweden

P2 – From Multichannel Signals to Brain Networks: Blind Identification and Tensor Methods

Prof. Borbála Hunyadi, Maastricht University, Delft University of Technology, Netherlands

P3 – System Architecture of 6G MIMO-ISAC and Related Topics

Dr. Wen Tong, CTO, Wireless Network, Huawei Technologies Co., Ltd.

P4 – Radar-Centric Sensing for Physical AI: From Autonomous Driving to Field Robotics

Prof. Shunqiao Sun, University of Alabama, USA

P5 – Data-Driven Modeling and Optimization of 5G Network Performance

Prof. Tom Luo, Chinese University of Hong Kong (Shenzhen), China

P6 – Parametric Modeling and Estimation of Extended Objects in ISAC

Prof. Lee Swindlehurst, University of California Irvine, USA

Tutorials

T1 – Toward Practical ELAA Systems: A Distributed Signal Processing Perspective

Prof. Tsung-Hui Chang and Dr. Yanqing Xu (The Chinese University of Hong Kong, Shenzhen, China)

T2 – Learning with Noisy Crowdsourced Labels: Insights from Signal Processing

Prof. Panagiotis A. Traganitis (Michigan State University, USA), Prof. Xiao Fu (Oregon State University, US), and Prof. Georgios B. Giannakis (University of Minnesota, USA)

T3 – Characterizing Ambiguities in Sparse Arrays

Prof. Marius Pesavento (TU Darmstadt, Germany)

T4 – Distributed ISAC for 6G: Architectures, Scalable Optimization, and Trustworthiness

Prof. Henk Wymeersch, Dr. Huiping Huang, and Dr. Hui Chen (Chalmers University of Technology, Sweden)

T5 – Model-Based Deep Learning for Sensor Array and Multichannel Signal Processing

Prof. Nir Shlezinger (Ben Gurion University, Israel)

T6 – Meta Surface-Aided Sensing: A Signal-Processing Perspective

Prof. Luca Venturino (University of Cassino and Southern Lazio, Cassino, Italy), Prof. Bhavani Shankar (University of Luxembourg, Luxembourg), Prof. Linlong Wu (University of Electronic Science and Technology of China, China), and Prof. Jiancheng An (National University of Singapore, Singapore)

Day 1: July 13, 2026

8:30-11:30, Terrance Room 1

Tutorial 1 – Toward Practical ELAA Systems: A Distributed Signal Processing Perspective

Prof. Tsung-Hui Chang (The Chinese University of Hong Kong, Shenzhen, China)

Dr. Yanqing Xu (The Chinese University of Hong Kong, Shenzhen, China)

8:30-11:30, Terrance Room 3

Tutorial 2 – Learning with Noisy Crowdsourced Labels: Insights from Signal Processing

Prof. Panagiotis A. Traganitis (Michigan State University, USA)

Prof. Xiao Fu (Oregon State University, USA)

Prof. Georgios B. Giannakis (University of Minnesota, USA)

13:00-16:00, Terrance Room 1

Tutorial 3 – Characterizing Ambiguities in Sparse Arrays

Prof. Marius Pesavento (TU Darmstadt, Germany)

13:00-16:00, Terrance Room 3

Tutorial 4 – Distributed ISAC for 6G: Architectures, Scalable Optimization, and Trustworthiness

Prof. Henk Wymeersch (Chalmers University of Technology, Sweden)

Prof. Huiping Huang (Macau University of Science and Technology, Macau SAR, China)

Dr. Hui Chen (Chalmers University of Technology, Sweden)

14:00-16:00, Poster Area

Best Student Papers Presentation

16:00-19:00, Terrance Room 1

Tutorial 5 – Model-Based Deep Learning for Sensor Array and Multichannel Signal Processing

Prof. Nir Shlezinger (Ben Gurion University, Israel)

16:00-19:00, Terrance Room 3

Tutorial 6 – Meta Surface-Aided Sensing: A Signal-Processing Perspective

Prof. Luca Venturino (University of Cassino and Southern Lazio, Cassino, Italy)

Prof. Bhavani Shankar (University of Luxembourg, Luxembourg)

Prof. Linlong Wu (University of Electronic Science and Technology of China, China)

Prof. Jiancheng An (National University of Singapore, Singapore)

19:00-21:00, 3rd floor Poolside Ballroom

Welcome Reception

Day 2: July 14, 2026

8:30-9:00 – Opening Ceremony (@Grande Ballroom)

9:00-10:00 – Plenary Talk (@Grande Ballroom)

Near-Field Beamfocusing: From Theory to Practice

Prof. Emil Björnson, KTH Royal Institute of Technology, Sweden

10:15-12:15-Lecture Sessions (@Grande Ballroom, Terrace Room-1, Terrace Room-3)

Regular Session L1-1: Direction-of-Arrival Estimation and Source Localization

Regular Session L1-2: MIMO Systems and Channel Estimation

Special Session L1-3: Tensor and Matrix Methods for Signal Processing

12:15-14:00 – Lunch

14:00-15:00 – Plenary Talk (@Grande Ballroom)

From Multichannel Signals to Brain Networks: Blind Identification and Tensor Methods

Prof. Borbála Hunyadi, Maastricht University, Delft University of Technology, Netherlands

15:00-16:30 – Poster Session (@Poster Area)

Special Session P1-1: Sparse Array Processing & Multifunctional RF Systems

Special Session P1-2: Low-Altitude Target Localization & DOA Estimation

Special Session P1-3: Adaptive, Data-Driven & Sparse Array Estimation

Special Session P1-4: Near-Field, MIMO & AI Array Processing

15:30-16:30 – Coffee Break, during poster session

16:30-18:30 – Lecture Sessions (@Grande Ballroom, Terrace Room-1, Terrace Room-3)

Regular Session L1-4: DOA Estimation and Localization for Radar & Communications

Special Session L1-5: Bayesian Deep Learning for Multichannel Signal Processing

Special Session L1-6: Sampling and Quantization under Hardware Constraints

Day 3: July 15, 2026

9:00-10:00 – Plenary Talk (@Grande Ballroom)

System Architecture of 6G MIMO-ISAC and Related Topics

Dr. Wen Tong, CTO, Wireless Network, Huawei Technologies Co., Ltd.

10:15-12:15-Lecture Sessions (@Grande Ballroom, Terrace Room-1, Terrace Room-3)

Regular Session L2-1: Multi-channel Signal Processing and Estimation

Regular Session L2-2: Array Processing and Beamforming for Radar & Audio

Special Session L2-3: Space-Time Adaptive Processing (STAP) for Radar and Sonar

12:15-14:00 – Lunch

14:00-15:00 – Plenary Talk (@Grande Ballroom)

Radar-Centric Sensing for Physical AI: From Autonomous Driving to Field Robotics

Prof. Shunqiao Sun, University of Alabama, USA

15:00-16:30 – Poster Session (@Poster Area)

Special Session P2-1: Radar Signal Processing & Resource Allocation

Special Session P2-2: Tensor, Multi-Sensor & ISC Array Processing

Special Session P2-3: Radar Imaging, Synthetic Aperture & Inverse Problems

Special Session P2-4: Remote Sensing, Vision Models & AI Data Fusion

15:30-16:30 – Coffee Break, during poster session

16:30-18:30 – Lecture Sessions (@Grande Ballroom, Terrace Room-1, Terrace Room-3)

Regular Session L2-4: Integrated Sensing and Communications (ISAC)

Regular Session L2-5: Synthetic Aperture Radar (SAR) Techniques

Special Session L2-6: Graph Signal Processing for Sensor Networks

18:45 – Banquet (@Grande Ballroom)

Day 4: July 16, 2026

9:00-10:00 – Plenary Talk (@Grande Ballroom)

Data-Driven Modeling and Optimization of 5G Network Performance
Prof. Tom Luo, Chinese University of Hong Kong (Shenzhen), China

10:15-12:15-Lecture Sessions (@Grande Ballroom, Terrace Room-1, Terrace Room-3)

Regular Session L3-1: Adaptive Beamforming and Array Processing
Regular Session L3-2: Sensor Networks and Multi-Agent Signal Processing
Special Session L3-3: Pervasive Health Monitoring and Radar Sensing

12:15-14:00 – Lunch

14:00-15:00 – Plenary Talk (@Grande Ballroom)

Parametric Modeling and Estimation of Extended Objects in ISAC
Prof. Lee Swindlehurst, University of California Irvine, USA

15:00-16:30 – Poster Session (@Poster Area)

Special Session P3-1: Reconfigurable Antennas, Secure Communications & UAV Networks
Special Session P3-2: Low-Altitude Intelligent Applications & Multi-Agent Systems
Special Session P3-3: Tracking, Sensor Networks & Multi-Agent Systems
Special Session P3-4: Multichannel Detection, Waveform Diversity & Robust Sensor Processing

15:30-16:30 – Coffee Break, during poster session

16:30-18:30–Closing Ceremony (@Grande Ballroom)

Regular Session L1-1: Direction-of-Arrival Estimation and Source Localization

Type: Lecture

Time: July 14, 2026, 10:15-12:15

Location: Grande Ballroom

Chairs: Nir Shlezinger (*Ben-Gurion University*); Xue Jiang (*Shanghai Jiaotong University*)

[#88] 10:15-10:35

Deep Learning-Aided DoA Estimation with Uncertainty Extraction

Raz Zohar (*Ben-Gurion University*); Shai Ginzach (*Technion*); Nir Shlezinger (*Ben-Gurion University*)*

[#95] 10:35-10:55

Iterative Constrained WLS Localization with Hybrid 1-D SA and TDOA Measurements

Yanbin Zou (*Shantou University*)*; Zhangyi Liu (*Shantou University*); Huaping Liu (*Oregon State University*); Tianyi Xing (*University of Electronic Science and Technology of China*); Yimao Sun (*Sichuan University*)

[#102] 10:55-11:15

Deep Learning Assisted Robust DOA Estimation for Small-Sized Microphone Array Using Sound Intensity Features

Jie Yin (*Nanjing University of Aeronautics and Astronautics*)*; Huawei Chen (*Nanjing University of Aeronautics and Astronautics*)

[#173] 11:15-11:35

Underdetermined DOA and Polarization Estimation for Arbitrary Polarization Sensitive Arrays

Jiaming Yang (*Beijing Institute of Technology*)*; Qing Shen (*Beijing Institute of Technology*); Bohan Chen (*Beijing Institute of Electronic System Engineering*); Zheng Fu (*School of Information and Electronics, Beijing Institute of Technology*)

[#181] 11:35-11:55

Uncertainty-Weighted Multi-Task CNN for Joint DoA and Rain-Rate Estimation Under Rain-Induced Array Distortions

Chenyang Yan (*KTH Royal Institute of Technology*)*; Ruonan Yang (*The University of Alabama*); Shunqiao Sun (*The University of Alabama*); Mats Bengtsson (*KTH Royal Institute of Technology*)

[#199] 11:55-12:15

A DOA Estimation Method for Distributed Nested Arrays Based on Non-Circular Signals

Zhaoyixin Li (*Beijing Institute of Technology*)*; Shiwei Ren (*Beijing Institute of Technology*); Weijiang Wang (*Beijing Institute of Technology*)

Regular Session L1-2: MIMO Systems and Channel Estimation

Type: Lecture

Time: July 14, 2026, 10:15-12:15

Location: Terrace Room-1

Chairs: Koichi Ichige (*Yokohama National University*); Jingwei Xu (*Xidian University*)

[#45] 10:15-10:35

Revisiting Hierarchical Processing for CF mMIMO: A Novel Antenna-Aware Weighting Approach
Zhe Wang (KTH Royal Institute of Technology); Shuaifei Chen (Purple Mountain Laboratories); Emil Björnson (KTH Royal Institute of Technology)*

[#107] 10:35-10:55

High-Accuracy Calibration of MIMO Radar Based on Directivity Error Model with Kronecker-Product Constraint
Ryuichiro Kataoka (Yokohama National University); Ryo Ijichi (Yokohama National University); Steven Wandale (Yokohama National University); Koichi Ichige (Yokohama National University); Shota Kunikata (Murata Manufacturing Co., Ltd.); Ryo Saito (Murata Manufacturing Co., Ltd.); Katsuhisa Kashiwagi (Murata Manufacturing Co., Ltd.); Takahiro Kinoshita (Murata Manufacturing Co., Ltd.)*

[#115] 10:55-11:15

Joint Design of Transmit Waveform and Spatial Filter for MIMO Radar ISRJ Mitigation
Wenzhuo Zhang (National University of Defense Technology); Zhihui Li (National University of Defense Technology); Qinxian Chen (National University of Defense Technology); Qingsong Zhou (National University of Defense Technology); Junpeng Shi (National University of Defense Technology); Chao Huang (National University of Defense Technology)*

[#162] 11:15-11:35

Low-Complexity Detection of Multiple Moving Targets with Distributed Radar System
Yuhang Song (Xidian University); Jingwei Xu (Xidian University); Shixing Yang (Xidian University); Jingjing Li (Air Force Engineering University)*

[#223] 11:35-11:55

Compression-based Joint Channel Estimation and Equalization in Low-Altitude MIMO System
Rui Shi (The Chinese University of Hong Kong, Shenzhen); Yanqing Xu (The Chinese University of Hong Kong, Shenzhen); Tsung-Hui Chang (The Chinese University of Hong Kong, Shenzhen)*

[#256] 11:55-12:15

Channel Estimation for RIS-Aided mmWave MIMO Systems via One-Sided Sparse Representation
Qianhong Wu (Shenzhen University); Zhenhua Zhou (Hangzhou Dianzi University); Xiaoen Xie (Hangzhou Dianzi University); Minhong Sun (Hangzhou Dianzi University); Bin Liao (Shenzhen University)*

Special Session L1-3: Tensor and Matrix Methods for Signal Processing

Type: Lecture

Time: July 14, 2026, 10:15-12:15

Location: Terrace Room-3

Chairs: *Xiao Fu (Oregon State University); Wenqiang Pu (The Chinese University of Hong Kong, Shenzhen)*

[#33] 10:15-10:35

Deep Tensor Factorization for Modeling Non-Uniform Temporal Dynamics with Adaptive Temporal Smoothing

Hongyu Chen (City University of Hongkong); Beining Bao (City University of Hong Kong); Zichun Liu (City University of Hong Kong); Tianshuo Wei (City University of Hong Kong); Maolin Wang (City University of Hong Kong); Xiaopeng Li (Shenzhen University); Hing Cheung So (City University of Hong Kong)*

[#81] 10:35-10:55

On Direction–Magnitude Decomposition in Low-Rank Matrix Optimization

Yudong Wei (ETH Zurich); Liang Zhang (ETH Zurich); Bingcong Li (ETH Zurich); Niao He (ETH Zurich)*

[#182] 10:55-11:15

Signature-Driven Pollen Classification via Tensor-Based Joint Probability Mass Function (PMF) Estimation

Alla Manina (Technische Universität Ilmenau); Joseph K. Chege (Technische Universität Ilmenau); Thomas Hornick (Helmholtz-Centre for Environmental Research – UFZ); Susanne Dunker (Helmholtz-Centre for Environmental Research – UFZ); Arie Yeredor (Tel Aviv University); Martin Haardt (Technische Universität Ilmenau)*

[#245] 11:15-11:35

Multilayer Simplex-Structured Matrix Factorization for Hyperspectral Unmixing with Endmember Variability

Junbin Liu (CUHK); Yuening Li (The Chinese University of Hong Kong); Wing-Kin Ma (The Chinese University of Hong Kong)*

[#255] 11:35-11:55

Off-Grid Spectrum Cartography via Deep Generative Models

*Chengyao Lyu (Oregon State University); Rajesh Shrestha (Oregon State University); Xiao Fu (Oregon State University)**

[#278] 11:55-12:15

Sample Complexity Analysis for Identifying the Minimum Volume Enclosing Simplex

*Kejun Huang (University of Florida)**

Regular Session L1-4: DOA Estimation and Localization for Radar & Communications

Type: Lecture

Time: July 14, 2026, 16:30-18:30

Location: Grande Ballroom

Chairs: *Shunqiao Sun (The University of Alabama); Chengwei Zhou (Zhejiang University)*

[#3] 16:30-16:50

Tensor Train Decomposition Based 2D-Angle Estimation in Bistatic MIMO Radar under Impulsive Noise

Qianpeng Xie (National University of Defense Technology); Xiao-Peng Li (Shenzhen University); Ji-Yuan Chen (Academy of Military Sciences); Bing Sun (China Satellite Maritime Tracking and Control Department)*

[#140] 16:50-17:10

Two-dimensional Line Spectral Estimation for Constant Modulus Signals via Convex Optimization
Yi-Lin Mo (Xi'an Jiaotong University); Zai Yang (Xi'an Jiaotong University); Wenlong Wang (Xi'an Jiaotong University)*

[#185] 17:10-17:30

A Two-Dimensional Super-Resolution Method for Reconfigurable Intelligent Surface-Assisted Near-Field Localization

Feng Xi (Nanjing University of Science and Technology); Dehui Yang (Xi'an Jiaotong-Liverpool University)*

[#187] 17:30-17:50

Mitigating Accumulated Bias in AOA Measurements for Single-Receiver Localization Using a Calibration Source

*Yi Gan (Southwest China Institute of Electronic Technology); Beichuan Tang (Sichuan University); Xunchao Cong (Southwest China Institute of Electronic Technology); Xu Yang (Southwest China Institute of Electronic Technology); Yanbing Yang (Sichuan University); Cheng Dai (Sichuan University); Liangyin Chen (Sichuan University); Yimao Sun (Sichuan University)**

[#251] 17:50-18:10

TransPNPC: Transformer-Based Deep Unfolding for Phase Noise Parameter Compensation in Beamspace DoA Estimation

Chi Wang (Technische Universität Ilmenau); Zhibin Yu (Huawei Technologies Duesseldorf GmbH); Tuna Gurbuz (Huawei Technologies Duesseldorf GmbH); Ahmed Abdelkader (Huawei Technologies Duesseldorf GmbH); Xiaofeng Wu (Huawei Technologies Duesseldorf GmbH); Martin Haardt (Technische Universität Ilmenau)*

[#253] 18:10-18:30

Single-Snapshot Localization Using Sparse Extremely Large Aperture Arrays

*Yunqiao Hu (The University of Alabama); Xuesu Xiao (George Mason University); Steven Jones (The University of Alabama); Shunqiao Sun (The University of Alabama)**

Special Session L1-5: Bayesian Deep Learning for Multichannel Signal Processing

Type: Lecture

Time: July 14, 2026, 16:30-18:10

Location: Terrace Room-1

Chairs: Zai Yang (*Xi'an Jiaotong University*); Dirk Slock (*EURECOM*)

[#28] 16:30-16:50

Joint Estimation of Wideband DOAs and Phase Errors for Distributed Array via Sparse Bayesian Inference

Qingming Zhang (Zhejiang University); Jia Luo (National Key Laboratory of Electromagnetic Space Security); Min Xu (National Key Laboratory of Electromagnetic Space Security); An Liu (Zhejiang University)*

[#135] 16:50-17:10

Deep Reinforcement Learning with Dynamic Action Space for QoE-Driven Scheduling in MIMO-OFDM Wi-Fi Networks

Yulan Yuan (The Hong Kong University of Science and Technology (Guangzhou)); Huayan Guo (The Hong Kong University of Science and Technology Shenzhen Research Institute); Danny H. K. Tsang (The Hong Kong University of Science and Technology (Guangzhou)); Vincent K. N. Lau (The Hong Kong University of Science and Technology)*

[#183] 17:10-17:30

Turbo-Structured Bayesian Channel Estimation for Non-Stationary Hybrid-Field RIS-Assisted Systems

Xiaokun Tuo (Zhejiang University); Mingmin Zhao (Zhejiang University)*

[#218] 17:30-17:50

Multi-RIS-Aided User Localization With Virtual Line-of-Sight Paths

Bin Li (Beijing Institute of Technology); Nan Wu (Beijing Institute of Technology); Yik-Chung Wu (The University of Hong Kong)*

[#243] 17:50-18:10

EP Detection with Banded Approximation for Unitary-Spread OFDM in Doubly Selective Channels

Zhuangzhuang Liao (Harbin Institute of Technology); Jichao Chen (EURECOM); Zunqi Li (Harbin Institute of Technology); Xiaojie Fang (Harbin Institute of Technology); Xuejun Sha (Harbin Institute of Technology); Dirk Slock (EURECOM)*

Special Session L1-6: Sampling and Quantization under Hardware Constraints

Type: Lecture

Time: July 14, 2026, 16:30-18:30

Location: Terrace Room-3

Chairs: Chun-Lin Liu (*National Taiwan University*); Heng Qiao (*Shanghai Jiao Tong University*)

[#22] 16:30-16:50

Toeplitz Covariance Estimation Under Coarse Quantization and Sparse Sampling

Hongwei Xu (*Xi'an Jiaotong University*)*; Zai Yang (*Xi'an Jiaotong University*); Weichao Zheng (*Xi'an Jiaotong University*)

[#53] 16:50-17:10

On-Board Two-Channel Modulo ADC System with Folding and Reconstruction

Zeyuan Li (*Anhui University*); Wenyi Yan (*Brunel University London*)*; Lu Gan (*Brunel University of London*); Guoquan Li (*Chongqing University of Posts and Telecommunications*); Hongqing Liu (*Chongqing University of Posts and Telecommunications*)

[#98] 17:10-17:30

A Data Aware Multi-bit Quantization Scheme for RF Signal Sensing

Tianpeng Pan (*The Chinese University of Hong Kong, Shenzhen*); Wenqiang Pu (*Shenzhen Research Institute of Big Data*)*; Peng Wang (*Skyfend Technology Co., Ltd.*); Ming-Yi You (*National Key Lab. of Electromagnetic Space Security, No.36 Research Institute of CETC*); Licheng Zhao (*Shenzhen Research Institute of Big Data*); Rui Zhou (*Shenzhen Research Institute of Big Data*)

[#193] 17:30-17:50

One-Bit DOA Estimation via $\ell_{2,0}$ -Regularized Sparse Recovery

Mingyang Chen (*Guangdong Industry Polytechnic University*)*; Xiao Peng Li (*Shenzhen University*); Lei Huang (*Shenzhen University*); Mohamed Rihan (*Menoufia University*); Qiang Li (*Shenzhen University*); Yan Ai (*Guangdong Industry Polytechnic University*)

[#248] 17:50-18:10

Block-Adaptive Autocorrelation Estimation for One-Bit Quantized Gaussian Data

Chun-Lin Liu (*National Taiwan University*)*; Hsing-Jou Chiu (*National Taiwan University*)

[#268] 18:10-18:30

A Dither-Based Precision Enhancement Method for Low-Bit ADCs in Spaceborne Calibration Systems

Qiuchen Liu (*Shenzhen University*); Zhicheng Zhang (*Shenzhen University*); Lei Huang (*Shenzhen University*)*; Yannan Chen (*Shenzhen University*); Guitong Chen (*Shenzhen University*); Yan Liu (*Shenzhen University*)

Regular Session L2-1: Multi-channel Signal Processing and Estimation

Type: Lecture

Time: July 15, 2026 10:15-12:15

Location: Grande Ballroom

Chairs: *Yongchan Gao (Xidian University); Linlin Mao (Institute of Acoustics, Chinese Academy of Sciences)*

[#29] 10:15-10:35

Fusing AMF and Multi-Baseline AMF-ATI Phases for SAR Ground Moving Target Detection

Baozhun Zhang, Min Tian, Penghui He, Bowen Jiang, Zhiwei Yang, Xianghai Li (Xidian University)

[#35] 10:35-10:55

Subspace-Based Adaptive Detection under Spatially Correlated Heavy-Tailed Sea Clutter

Zhongshu Li (university of science and technology of china); Zheng Wang (University of Science and Technology of China); Jun Liu (University of Science and Technology of China)*

[#125] 10:55-11:15

Joint Spatio-Temporal Subgraph Filter Learning

Purui Zhang (Nanyang Technological University); Wee Peng Tay (Nanyang Technological University); Bihan Wen (Nanyang Technological University)*

[#89] 11:15-11:35

EM-KalmanNet: AI-Aided Kalman Tracking in Partially Known Time-Varying State-Space Models

Ori Cohen (Ben-Gurion University); Xiaoyong Ni (EPFL); Nir Shlezinger (Ben-Gurion University); Tirza Routtenberg (Ben-Gurion University)*

[#116] 11:35-11:55

CPDNet: Neural Online Error Monitoring for AI-Aided Kalman Filters

*Wenyi Zhang (Northwestern Polytechnical University); Xiaoyong Ni (EPFL); Nir Shlezinger (Ben-Gurion University of the Negev); Zengfu Wang (Northwestern Polytechnical University)**

[#262] 11:55-12:15

EM-Aided AMP for Sparse Channel Recovery and Ranging in Nakagami-m Fading

Xiyao Zhou (EURECOM); Fangqing Xiao (EURECOM); Dirk Slock (EURECOM)*

Regular Session L2-2: Array Processing and Beamforming for Radar & Audio

Type: Lecture

Time: July 15, 2026 10:15-12:15

Location: Terrace Room-1

Chairs: Penghui Huang (Shanghai Jiao Tong University); Jing Tian (Beijing Institute of Technology)

[#7] 10:15-10:35

Robust beamforming anti-mainlobe jamming method based on MIMO-STCA radar

Wei Chen (China Air-borne Missile Academy); Huake Wang (Xidian University)*; Qichang Tang (Xidian University); Guisheng Liao (Xidian University)

[#62] 10:35-10:55

A Directional-Derivative-Constrained Method for Continuously Steerable Differential Beamformers with Uniform Circular Arrays

Tiantian Xiong (Wuhan University)*; Yongyi Deng (Wuhan University); Kunlong Zhao (Wuhan University); Jilu Jin (Northwestern Polytechnical University); Xueqin Luo (Northwestern Polytechnical University); Gongping Huang (Wuhan University); Jingdong Chen (Wuhan University); Jacob Benesty (University of Quebec)

[#142] 10:55-11:15

Robust Near-Field Beamforming Based on Probability Constraints and Aperture Perturbations

Gerald Nwalozi (Communication Research Laboratory, Ilmenau University of Technology)*; Martin Haardt (Communication Research Laboratory, Ilmenau University of Technology)

[#150] 11:15-11:35

Matrix Kronecker Product Multichannel Linear Prediction for Speech Dereverberation

Kang Chen (Wuhan University)*; Jilu Jin (Northwestern Polytechnical University); Xueqin Luo (Northwestern Polytechnical University); Xianrui Wang (Northwestern Polytechnical University); Gongping Huang (Wuhan University); Jingdong Chen (Wuhan University); Jacob Benesty (University of Quebec)

[#174] 11:35-11:55

Living Person Presence Sensing Based on Non-Coherent MIMO Radar

PeiChao Wang (University of Electronic Science and Technology of China); Qian He (University of Electronic Science and Technology of China)*

[#177] 11:55-12:15

Range Ambiguous Clutter Suppression Based on Random Pulse Repetition Interval for Spaceborne Radar Systems

Fan Yang (Shanghai Jiao Tong University)*; Peili Xi (Shanghai Institute of Satellite Engineering); Xiangcheng Wan (Shanghai Institute of Satellite Engineering); Qingqing Wu (Shanghai Jiao Tong University); Yan Jiang (Shanghai Institute of Satellite Engineering); Xiaoying Gu (Shanghai Jiao Tong University); Jia Song (Shanghai Jiao Tong University); Jingtao Ma (Shanghai Normal University); Penghui Huang (Shanghai Jiao Tong University)

Special Session L2-3: Space-Time Adaptive Processing (STAP) for Radar and Sonar

Type: Lecture

Time: July 15, 2026 10:15-12:15

Location: Terrace Room-3

Chairs: *Weijian Liu (Wuhan Electronic Information Institute); Keqing Duan (Sun Yat-sen University)*

[#9] 10:15-10:35

Deep Learning based End-to-End Nonlinear Space-Time Adaptive Processing

Zhipeng Liao (Sun Yat-sen University); Keqing Duan (Sun Yat-sen University); Wei Shen (Sun Yat-sen University)*

[#16] 10:35-10:55

Pulse-Agile Waveform and STAP Filter Design for Airborne MIMO DFRC Systems

Ye Lai (Sun Yat-sen University); Keqing Duan (Sun Yat-sen University); Wei Shen (Sun Yat-sen University); Zizhou Qiu (Sun Yat-sen University)*

[#37] 10:55-11:15

Propeller-Modulated Clutter Suppression Technique for UAV-borne Radar

Chenran Gao (Wuhan Radar Academy); Wenchong Xie (Wuhan Radar Academy); Yuanyi Xiong (Wuhan Radar Academy); Wei Chen (Wuhan Radar Academy); Chengyin Liu (Wuhan Radar Academy); Buqiu Tian (Wuhan Radar Academy); Ming Hou (Wuhan Radar Academy); Jiayi Zhang (Wuhan Radar Academy)*

[#157] 11:15-11:35

SAMNet: Recognition and Mitigation of Interference Signals

Chuhan Diao (Xidian University); Lan Lan (Xidian University); Yanxing Wang (Xidian University); Xiang Zhang (Xidian University); Guisheng Liao (Xidian University)*

[#168] 11:35-11:55

A GAN-Based Sparse Recovery Approach for Airborne Radar Clutter Suppression

Gengze Qin (Shanghai Jiaotong University); Xi Peili (Shanghai Institute of Satellite Engineering); Chen Guozhong (Shanghai Institute of Satellite Engineering); Wan Xiangcheng (Shanghai Institute of Satellite Engineering); Wu Qingqing (Shanghai Jiaotong University); Wang Lingyu (Shanghai Jiaotong University); Zhu Yu (Shanghai Jiao Tong University); Shan Zhengliang (Shanghai Jiao Tong University); Huang Penghui (Shanghai Jiao Tong University)*

[#198] 11:55-12:15

An EM-based Detection Approach for Multiple Targets with Unknown Signal Signatures

Linjie Yan (Institute of Acoustics, Chinese Academy of Sciences); Jiarui Sun (Institute of Acoustics, Chinese Academy of Sciences); Chengpeng Hao (Institute of Acoustics, Chinese academy of sciences); Giuseppe Ricci (University of Salento, Via Monteroni); Danilo Orlando (Università di Pisa)*

Regular Session L2-4: Integrated Sensing and Communications (ISAC)

Type: Lecture

Time: July 15, 2026, 16:30-18:30

Location: Grande Ballroom

Chairs: Fan Liu (Southeast University); Xiangrong Wang (Beihang University)

[#26] 16:30-16:50

Sensing Security-Aware Beamforming for MIMO-OFDM ISAC via Deceptive AF Engineering

Lingyun Xu (University of Electronic Science and Technology of China); Bowen Wang (King's College London); Ziyang Cheng (University of Electronic Science and Technology of China)*; Bin Liao (Shenzhen University)

[#184] 16:50-17:10

Orthogonal Waveform Design for Integrated Sensing and Communication Networked Base Stations in Low-Altitude Sensing Scenarios

Chunhua Wang (Inner Mongolia University); Hao Zheng (Inner Mongolia University)*; Yinghui Zhang (Inner Mongolia University); Junkun Yan (Xidian University); Jian Xu (The 601 Institute, The 6th Academy of China Aerospace Science and Industry CORP)

[#190] 17:10-17:30

Dual Radar Imaging and Communications with Directional Sparse Transmit-Receive Beamforming

Shuotong Yu (Beihang University); Xiangrong Wang (Beihang University)*; Moeness Amin (Villanova University); Qing Wang (Tianjin University)

[#192] 17:30-17:50

Joint Timing and Carrier Frequency Offset Estimation with Interference Suppression for Multi-Static ISAC Systems

Zhuoli Liu (University of Science and Technology of China)*; Hao Zhu (University of Science and Technology of China); Menglong Wu (University of Science and Technology of China)

[#216] 17:50-18:10

Transmit Beampattern Optimization Algorithm in Networked Dual-function Radar-communication System for Low Probability of Interception

Ying Chen (Nanjing University of Aeronautics and Astronautics); Haozheng Wu (Nanjing University of Aeronautics and Astronautics); Chenguang Shi (Nanjing University of Aeronautics and Astronautics)*; Jianjiang Zhou (Nanjing University of Aeronautics and Astronautics)

[#272] 18:10-18:30

SAR Imaging Based on OFDM Waveform for UAV-ISAC Systems

Qinghui Lu (Shanghai Jiao Tong University)*; Zhen Du (Nanjing University of Information Science and Technology); Zenghui Zhang (Shanghai Jiao Tong University)

Regular Session L2-5: Synthetic Aperture Radar (SAR) Techniques

Type: Lecture

Time: July 15, 2026, 16:30-18:30

Location: Terrace Room-1

Chairs: Junjun Yin (*University of Science and Technology Beijing*); Bo Zhao (*Shenzhen University*)

[#67] 16:30-16:50

A Learnable Feature Preprocessing Front-End Based Network for SAR Ship Classification

*Bowen Wang (Naval University of Engineering)**

[#75] 16:50-17:10

Multi-Angle ISAR Image Fusion for Aerial Target Recognition Using Image Transformer

Diancheng Wu (Nanjing University of Aeronautics and Astronautics); Lingzhi Zhu (Nanjing University of Aeronautics and Astronautics); Weijie Xia (Nanjing University of Aeronautics and Astronautics); Jianjiang Zhou (Nanjing University of Aeronautics and Astronautics)*

[#76] 17:10-17:30

Supapixel Based Speckle Noise Filtering for Video SAR-GMTI

*Bowen Jiang (Hangzhou Institute of Technology, Xidian University)**

[#138] 17:30-17:50

Class Adaptive Threshold Re-weighting Loss for Small Object Detection in Automotive SAR

Xu Shuo (The Guangdong Key Laboratory of Intelligent Low-Altitude Perception, The State Key Laboratory of Radio Frequency Heterogeneous Integration); Si Cuiqi (The Guangdong Key Laboratory of Intelligent Low-Altitude Perception, The State Key Laboratory of Radio Frequency Heterogeneous Integration); Huang Lei (The Guangdong Key Laboratory of Intelligent Low-Altitude Perception, The State Key Laboratory of Radio Frequency Heterogeneous Integration); Zhao Bo (The Guangdong Key Laboratory of Intelligent Low-Altitude Perception, The State Key Laboratory of Radio Frequency Heterogeneous Integration)*

[#145] 17:50-18:10

Automatic Annotation for Automotive SAR Dataset Based on Optical Information Transfer

Bo Zhao (Shenzhen University); Cuiqi Si (Shenzhen University); Fengming Huang (Shenzhen University)*

[#269] 18:10-18:30

Cluster-Level Weighted SAR Radiometric Cross-Calibration Using Urban Building Areas

*Yingkui Zhang (Shenzhen University)**

Special Session L2-6: Graph Signal Processing for Sensor Networks

Type: Lecture

Time: July 15, 2026, 16:30-18:30

Location: Terrace Room-3

Chairs: Ercan E. Kuruoğlu (*Tsinghua Shenzhen International Graduate Institute*); Lan Lan (*Xidian University*)

[#276] 16:30-16:50

On Graph and Hypergraph Inference via Structural Equation Models

Geert Leus (TU Delft); Antonio G. Marques (Rey Juan Carlos University)*

[#134] 16:50-17:10

Improved Rain Mapping by Graph Signal Processing Tools

Yaara Peled (Tel Aviv University); Hagit Messer (Tel Aviv University); Tirza Routtenberg (Ben-Gurion University)*

[#21] 17:10-17:30

Target Localization in Distributed FDA-MIMO Radar using Factor Graph

Runlong Ma (Xidian University); Lan Lan (Xidian University); Guisheng Liao (Xidian University)*

[#85] 17:30-17:50

Robust Wind Power Interval Forecasting via Adaptive Graph Conformal Inference under Distribution Shifts

*Yang Bian (Huaiyin Institute of Technology); Jie Bao (Huaiyin Institute of Technology); Suqun Cao (Huaiyin Institute of Technology); Rui Luo (City University of Hong Kong)**

[#188] 17:50-18:10

Joint Topology Identification and Signal Inference by SEM

Aimin Jiang (Hohai University); Rui Yang (Hohai University); Jie Zhou (Hohai University); Yibin Tang (Hohai University); Min Li (Hohai University); Yanping Zhu (Changzhou University)*

[#238] 18:10-18:30

Identifying Influential Nodes in Epidemic Spread Using Temporal Local Variation

Darapu Sudeepini (International Institute of Information Technology Hyderabad); Ghosh Subrata (Technical University of Lodz, Poland); Senapati Abhishek (National University of Singapore); Ghosh Dibakar (Indian Statistical Institute); Hens Chittaranjan (International Institute of Information Technology Hyderabad); Nannuru Santosh (International Institute of Information Technology Hyderabad)*

Regular Session L3-1: Adaptive Beamforming and Array Processing

Type: Lecture

Time: July 16, 2026, 10:15-12:15

Location: Grande Ballroom

Chairs: *Guolong Cui (University of Electronic Science and Technology of China; Huiping Huang (Macau University of Science and Technology)*

[#51] 10:15-10:35

CTS-CFAR: A Robust CFAR Detector for Outlier-Contaminated Environments

Jiachen Zhu (South China University of Technology); Wenhao He (South China University of Technology); Fangjiong Chen (South China University of Technology)*

[#127] 10:35-10:55

Spatial Non-stationary Near-Field Channel Estimation for mmWave Multi-User ELAA Systems via Low-Rank Tensor Decomposition

Jionghui Wang (University of Electronic Science and Technology of China); Jilin Wang (University of Electronic Science and Technology of China); Wenyan Ma (Department of Electrical and Computer Engineering, National University of Singapore)*

[#108] 10:55-11:15

MVDR-Consistent Graph-Attention Beamforming with Local Conformer for Multichannel Speech Enhancement

Xingyu Shen (Concordia University); Wei-Ping Zhu (Concordia University); Benoit Champagne (McGill University)*

[#203] 11:15-11:35

Adaptive Radar Detection of Dim Targets Assisted by RIS

*Yuxi Jin (The Institute of Acoustics of the Chinese Academy of Science)**

[#230] 11:35-11:55

Orthogonal Phase Modulation LFM Waveforms for MIMO Distributed Space-Based Radar

Yuxing Zhao (Shanghai Jiao Tong University); Changrong Hu (Shanghai Academy of Spaceflight Technology); Haojuan Yuan (Shanghai Aerospace Electronic Technology Institute); Muyang Zhan (Shanghai Aerospace Electronic Technology Institute); Qing Ling (Naval University of Engineering); Fan Yang (Shanghai Jiao Tong University); Lang Xia (Shanghai Jiao Tong University); Zihao Zou (Aerospace Information Research Institute, Chinese Academy of Sciences); Penghui Huang (Shanghai Jiao Tong University)*

[#241] 11:55-12:15

Focal Region Shape and Energy Approximation for Frequency Diverse Array

Yuran Sun (Imperial College London); Wei Dai (Imperial College London)*

Regular Session L3-2: Sensor Networks and Multi Agent Signal Processing

Type: Lecture

Time: July 16, 2026, 10:15-11:55

Location: Terrace Room-1

Chairs: *Linlong Wu (University of Electronic Science and Technology of China); Jonathan Manton (University of Melbourne)*

[#11] 10:15-10:35

Distributed Normalized Maximum Correntropy Algorithm with Step-Size Control

Hongshun Yu (Southwest University of Science and Technology); Yi Yu (Southwest University of Science and Technology); Hongsen He (Southwest University of Science and Technology); Yuriy Zakharov (University of York); Rodrigo C. de Lamare (CETUC, PUC-Rio)*

[#80] 10:35-10:55

FastICA with Learned Scores from the Empirical Characteristic Function

David Watts (University of Melbourne); Jonathan Manton (University of Melbourne)*

[#99] 10:55-11:15

Gaussian Mixture PMBM Filtering for Multi-Sensor Bearings-Only Multi-Target Tracking

Huaxiucairang Ha (University of Science and Technology of China); Shiqi Pei (University of Science and Technology of China); Zhen Wang (University of Science and Technology of China); Chang Chen (University of Science and Technology of China); Weidong Chen (University of Science and Technology of China)*

[#74] 11:15-11:35

A Sufficient Lower Bound for Sampling of Multiple Correlated Stochastic Signals

Lin Jin (Fudan University); Hang Sheng (Fudan University); Hui Feng (Fudan University); Bo Hu (Fudan University)*

[#141] 11:35-11:55

Enhanced Multidimensional Time Series Forecasting via Pre-trained Temporal Encoders and GNNs

Yu Li, Xiaoxiao Wu, Zhangyuhua Wen, Shengli Zhang (Shenzhen University)

Special Session L3-3: Pervasive Health Monitoring and Radar Sensing

Type: Lecture

Time: July 16, 2026, 10:15-11:55

Location: Terrace Room-3

Chairs: *Qian He (University of Electronic Science and Technology of China); Pu Wang (Mitsubishi Electric Research Laboratories)*

[#8] 10:15-10:35

TFC-MAE: A Time-Frequency Cross-Attention Masked Autoencoder for ECG Signals

Hailun Wang (Tsinghua University); Long Pu (Tsinghua University); Gang Li (Tsinghua University)*

[#32] 10:35-10:55

Radar-Based Gait Analysis for Early Detection of Mobility Impairments

Abdullah Akaydin (University of Glasgow); Alistair Cooper (University of Glasgow); Julien Le Kernec (University of Glasgow)*

[#44] 10:55-11:15

In-Car Vital Sign Detection and Respiratory Rate Estimation Using NLS-Modified I/Q Radar Signals

Seyedeh Fatemeh Mirhosseini (University of Luxembourg); Mohammad Alae-Kerahroodi (University of Luxembourg); Udo Schroeder (IEE S.A, Luxembourg); Bhavani Shankar M. R. (University of Luxembourg)*

[#131] 11:15-11:35

CaSDOM: Contactless Sleep Disorder Monitoring Using Radar Sensing

*Furui Chen (School of Cyberspace Security, University of Science and Technology of China (USTC)); Zhi Lu (School of Cyberspace Security, University of Science and Technology of China (USTC)); Fang Zhou (School of Cyberspace Security, University of Science and Technology of China (USTC)); Yu Pu (University of Science and Technology of China (USTC)); Dongheng Zhang (School of Cyberspace Security, University of Science and Technology of China (USTC)); Yan Chen (School of Cyberspace Security, University of Science and Technology of China (USTC))**

[#171] 11:35-11:55

Quickest Abnormal Respiration Detection via Cloud MIMO Radar with Time Delay-Quantization

*PeiChao Wang (University of Electronic Science and Technology of China); Qian He (University of Electronic Science and Technology of China)**

Poster Session P1-1: Sparse Array Processing & Multifunctional RF Systems

Type: Poster

Time: July 14, 2026, 15:00-16:30

Location: Poster Area, board 1-9

Chairs: Zhi Zheng (*University of Electronic Science and Technology of China*); Chenguang Shi (*Nanjing University of Aeronautics and Astronautics*)

[#12]

Fourth-order Difference Co-array based Unfolded Coprime Padded L-shaped Array Design
Yifan Zhang (*Ningbo University*); Hua Chen (*Ningbo University*)*; Wei Liu (*The Hong Kong Polytechnic University*); Ye Tian (*Ningbo University*); Ming Jin (*Ningbo University*); Hing Cheung So (*City University of Hong Kong*)

[#40]

Semi-Passive RIS-Aided Super-Resolution DOA Estimation via Power-Domain Covariance Inversion and Difference Coarray Fusion
Chenchen Niu (*Ningbo University*); Ye Tian (*Ningbo University*)*; He Xu (*Ningbo University of Technology*); Wei Liu (*Hong Kong Polytechnic University*); Tuo Wu (*City University of Hong Kong*)

[#68]

A Generalized Hole-Filling Strategy for Coprime Array Design
Haoyue Zhang (*National University of Defense Technology*)*; Junpeng Shi (*National University of Defense Technology*)

[#179]

Shift-Based Augmented Coprime Array with Reduced Mutual Coupling Effect
Xi Kang (*Beijing Institute of Technology*)*; Bohan Chen (*Beijing Institute of Electronic System Engineering*); Zheng Fu (*Beijing Institute of Technology*); Zexiang Zhang (*China Academy of Electronics and Information Technology*); Qing Shen (*Beijing Institute of Technology*)

[#232]

Phase Interferometer Direction-Finding with Multi-Frequency Sparse Arrays
Gencun Zhu (*Xidian University*)*; Guodong Qin (*Xidian University*); Minyi You (*The National Key Laboratory of Electromagnetic Space Security*); Yabo Li (*Xidian University*); Wuhui Wang (*Xidian University*)

[#250]

Reweighted Atomic Norm Minimization for DOA Estimation of Mixed Coherent and Uncorrelated Signals With Coprime Arrays
Zilong Zheng (*Hainan University*); Mingcheng Fu (*Hainan University*)*

[#146]

Joint Waveform Design and Beampattern Control for FDA-MIMO Dual-Function Radar-Communication Systems
Haozheng Wu (*Nanjing University of Aeronautics and Astronautics*); Chenguang Shi (*Nanjing*

University of Aeronautics and Astronautics); Jianjiang Zhou (Nanjing University of Aeronautics and Astronautics)*

[#159]

Integrated Waveform and Mismatched Filters Design for Distributed DFRC System

Xue Yao (Chongqing Sanxia University of Science and Technology); Junhao Zhang (Chongqing Sanxia University of Science and Technology); Xianxiang Yu (University of Electronic Science and Technology of China)*

[#247]

OTFS-ISAC Signal PAPR Suppression Based on Piecewise Companding

Yongjun Liu (Xidian university); Ying Liu (Xidian university); Daisheng Zhang (Jianghuai Advanced Technology Center); Yimo Han (Xidian university); Tao Jiang (Xidian university)*

Session P1-2: Low-Altitude Target Localization & DOA Estimation

Type: Poster

Time: July 14, 2026, 15:00-16:30

Location: Poster Area, board 10-18

Chairs: *Jianfeng Li (Nanjing University of Aeronautics and Astronautics); Hua Chen (Ningbo University)*

[#60]

Data Completion Model-based 2-D DOA Estimation for L-shaped array

Xuezhao Wen (Ningbo University); Hua Chen (Ningbo University); Yanyan Guo (Ningbo University); Wanjun Zhang (Ningbo University)*

[#94]

CMR-GAN: Covariance Matrix Reconstruction for Coherent DOA Estimation

*Xudong Dong (Hangzhou Dianzi University)**

[#96]

A Neural Network-Based DPD Algorithm For Low SNR And Off-Grid

*Xudong Dong (Hangzhou Dianzi University)**

[#156]

Robust DOA Estimation in Impulsive Noise via Entropy-Adaptive Processing Algorithm

Huihui Zhao (China Jiliang University); Jun Zhao (China Jiliang University); Juntao Huang (China Jiliang University); Fang Zhou (China Jiliang University); Xudong Dong (Hangzhou Dianzi University); Daying Quan (China Jiliang University)*

[#210]

Dynamic Node Selection for Direct Target Tracking Based on Semidefinite Programming

Qing Liu (Northwestern Polytechnical University); Jian Xie (Northwestern Polytechnical University); Zhaolin Zhang (Northwestern Polytechnical University); Ling Wang (Northwestern Polytechnical University)*

[#235]

Joint 2-D Sensor Location Calibration and DOA Estimation for Virtual Coprime Arrays with a Single Movable Antenna

Qixuan Lu (Nanjing University of Aeronautics and Astronautics); Jingjing Pan (Nanjing University of Aeronautics and Astronautics); Weiyi Sun (Nanjing University of Aeronautics and Astronautics); Meng Sun (Nanjing University of Aeronautics and Astronautics); Yuehe Ning (Nanjing University of Aeronautics and Astronautics)*

[#236]

Modified 1D Decoupled Near-Field Source Localization: Ambiguity Analysis and Suppression

Yuehe Ning (Nanjing University of Aeronautics and Astronautics); Jingjing Pan (Nanjing University of Aeronautics and Astronautics); Jian Chen (Nanjing University of Aeronautics and Astronautics); Meng Sun (Nanjing University of Aeronautics and Astronautics); Jianfeng Li (Nanjing University of Aeronautics and Astronautics); Xiaofei Zhang (Nanjing University of Aeronautics and Astronautics); Qixuan Lu (Nanjing University of Aeronautics and Astronautics)*

[#93]

Closed-Form Solutions for Improving Sensor Position Accuracy via Inter-Sensor Ranges

Yanbin Zou (Shantou University); Xiaofei Li (Shantou University); Huaping Liu (Oregon State University)*

[#249]

Geolocation Calibration for Rotational Interferometer based on Windowed Temporal Convolutional Multilayer Perceptron

Yuenan Yang (Northwestern Polytechnical University); Zhaolin Zhang (Northwestern Polytechnical University); Jian Xie (Northwestern Polytechnical University); Ling Wang (Northwestern Polytechnical University)*

Session P1-3: Adaptive, Data-Driven & Sparse Array Estimation

Type: Poster

Time: July 14, 2026, 15:00-16:30

Location: Poster Area, board 19-26

Chairs: *Ying-Ren Chien (National Taipei University of Technology); Guobing Qian (Southwest University)*

[#14]

Constructing Finite-Order Kernel Models for Performance Evaluation of Kernel Adaptive Filtering in Real-World Scenarios

Ying-Ren Chien (National Taipei University of Technology); En-Ting Lin (National Ilan University); Guobing Qian (Southwest University)*

[#204]

Gridless Sparse Array Design for Beampattern Optimization

*Cheng-Hsuan Chien (National Taiwan University); Chun-Lin Liu (National Taiwan University)**

[#266]

Combined Step-Size Subspace Tracking Algorithm Based on Maximum Correntropy Criterion

Jin Wu (Southwest University of Science and Technology); Yi Yu (Southwest University of Science and Technology); Hongsen He (Southwest University of Science and Technology); Rodrigo C. de Lamare (University of York); Ke Li (Southwest University of Science and Technology)*

[#19]

One-bit Phase Retrieval via Double-Sparsity Constraints

Peibin Wu (Shenzhen University); Jing Zhang (Shenzhen University); Xiao-Peng Li (Shenzhen University); Lei Huang (Shenzhen University); Qiang Li (Shenzhen University); Xinzhu Chen (Shenzhen University)*

[#186]

LWANM: Learned Weighted Atomic Norm Minimization with Data-driven Weighting Mechanism

Zhuoli Zhang (Xi'an Jiaotong University); Zai Yang (Xi'an Jiaotong University); Wenlong Wang (Xi'an Jiaotong University); Zhiqiang Wei (Xi'an Jiaotong University)*

[#208]

Slot-Attention Guided Hybrid-Driven Extended Object Tracking

Runhe Gan (University of Electronic Science and Technology of China); Wei Xia (University of Electronic Science and Technology of China); Xuefei Feng (University of Electronic Science and Technology of China)*

[#101]

Scaling Behavior of MVDR Beamforming in Fixed-Spacing Large Linear Microphone Arrays

Yujie Zhu (Electronic Information School, Wuhan University); Jilu Jin (CIAIC, Northwestern Polytechnical University); Xueqin Luo (Northwestern Polytechnical University); Gongping Huang (Wuhan University); Jingdong Chen (Wuhan University); Jacob Benesty (University of Quebec)*

[#227]

Adaptive Doppler wrapping Method for Crab Angle Compensation in Airborne Early Warning Radar

Lang Xia (Shanghai Jiao Tong University); Muyang Zhan (Shanghai Aerospace Electronics Technology Institute); Lingyu Wang (Shanghai Jiao Tong University); Zihao Zou (Aerospace Information Research Institute, Chinese Academy of Sciences); Jingtao Ma (Shanghai Normal University); Qing Ling (Naval University of Engineering); Jiaqi Wang (Shanghai Jiao Tong*

University); Yuxing Zhao (Shanghai Jiao Tong University); Penghui Huang (Shanghai Jiao Tong University)

Session P1-4: Near-Field, MIMO & AI Array Processing

Type: Poster

Time: July 14, 2026, 15:00-16:30

Location: Poster Area, board 27-34

Chairs: Yan Huang (Southeast University); Lei Zuo (Xidian University)

[#20]

Contactless Cardiopulmonary Monitoring Using Wi-Fi Channel Features

Dou Fan (Xi'an University of Technology)*; Tao Huang (James Cook University); Borui Li (Xi'an University of Technology); Rong Fei (Xi'an University of Technology); Junhuai Li (Xi'an University of Technology)

[#41]

Nested array design of extended coprime sets for DOA estimation of non-circular signals

Dongqi Chen*; Kun Ye; Chuanxi Xing (Yunnan Minzu University); Waqas Khalid (Next Generation Internet of Everything Laboratory (NGIoE Lab)); Huiping Huang (Chalmers University of Technology)

[#123]

A Learning-Assisted LRT Method for Massive MIMO Radar Near-Field Detection Under Model Mismatch

Shabing Ye (Zhejiang International Studies University)*

[#128]

Performance Prediction for Passive Localization using Conditional Normalizing Flows

Hanyue Guo (Xidian university); Rui Zhou (Shenzhen Research Institute of Big Data)*; Wenqiang Pu (Shenzhen Research Institute of Big Data); Licheng Zhao (Shenzhen Research Institute of Big Data); Ming-Yi You (National Key Laboratory of Electromagnetic Space Security); JunKun Yan (National Key Laboratory of Radar Signal Processing)

[#197]

Robust Joint Angle-Range-Velocity Estimation for AFDM-Based MIMO-ISAC Systems

Jie Li (Nanjing University of Aeronautics and Astronautics)*; Peng Xu (Nanjing University of Aeronautics and Astronautics); Kaiwen Shi (Nanjing University of Aeronautics and Astronautics); Ziyu Dong (Nanjing University of Aeronautics and Astronautics)

[#43]

Reconfigurable Intelligent Surface Aided Mixed Source Localization by a Single Receiving Antenna

Ziyi Qiu (Ningbo University); Ye Tian (Ningbo University); He Xu (Ningbo University of Technology)*

[#106]

Nonlinear-Embedding Transformer based Modulation Recognition for Sub-Nyquist Sampling Systems with Reduced Channels

Heping Lu (Xidian University); Dawei Gao (Xidian University); Yaxing Yue (Xidian University); Yufeng Chen (Xidian University); Liyang Chen (Xidian University); Guisheng Liao (Xidian University)*

[#215]

A Fast Group Sparse Phase Retrieval Algorithm for DOA Estimation Based on Polar-Coupled Array Architecture

Wei Wang (Hainan University); Xiang Lan (Hainan University); Xianpeng Wang (Hainan University)*

Session P2-1: Radar Signal Processing & Resource Allocation

Type: Poster

Time: July 15, 2026, 15:00-16:30

Location: Poster Area, board 1-8

Chairs: *Junkun Yan (Xidian University); Wei Yi (University of Electronic Science and Technology of China)*

[#23]

Parallel Successive Optimization for Unimodular Fractional Quadratic Programming

Licheng Zhao (Shenzhen Research Institute of Big Data); Rui Zhou (Shenzhen Research Institute of Big Data); Wenqiang Pu (Shenzhen Research Institute of Big Data)*

[#79]

Boolean Time-Slice Scheduling for Cooperative Multi-Target Tracking With Phased-Array Sensors

Ge Bai (National Laboratory of Radar Signal Processing, Xidian University); Junkun Yan (National Laboratory of Radar Signal Processing, Xidian University); Peng Zhang (National Laboratory of Radar Signal Processing, Xidian University); Hao Jiao (National Laboratory of Radar Signal Processing, Xidian University); Hongwei Liu (National Laboratory of Radar Signal Processing, Xidian University)*

[#113]

EM-Based Joint DOA and Delay–Doppler Estimation for Passive Coherent Localization

Youbin Que (Xidian University); Tianyi Jia (Xidian University); Hongwei Liu (Xidian University); Xudong Dang (Xidian University); Hongtao Su (Xidian University)*

[#148]

Joint TR Beam Allocation and Multidimensional Resource Optimization Scheme for Multi-Target Tracking in Airborne Radar Networks

Diangang Wang (Nanjing University of Aeronautics and Astronautics); Xinrui Zhang (Nanjing University of Aeronautics and Astronautics); Chenguang Shi (Nanjing University of Aeronautics and Astronautics); Jianjiang Zhou (Nanjing University of Aeronautics and Astronautics)*

[#207]

Robust Transmit Beampattern Design of Colocated MIMO Radar for Multi-Target Tracking under Parameter Estimation Uncertainty

*Zifang Bai (University of Electronic Science and Technology of China)**

[#219]

Joint Dwell Time Allocation and Route Planning for Targets Tracking in Radar Network via Deep Reinforcement Learning

*Zhixian Wu (Nanjing University of Information Science and Technology); Yang Su (Nanjing University of Information Science and Technology)**

[#224]

A Fast Iterative Multipath Parameter Estimation Algorithm Based on the Maximum Likelihood Criterion for GNSS Receivers

Tiancheng Hou (School of Information and Electronics, Beijing Institute of Technology); Yuanhao Ma (School of Information and Electronics, Beijing Institute of Technology); Yizhe Pan (School of Information and Electronics, Beijing Institute of Technology); Chen Ning (School of Information and Electronics, Beijing Institute of Technology); Jing Tian (School of Information and Electronics, Beijing Institute of Technology); Wei Cui (School of Information and Electronics, Beijing Institute of Technology)*

[#240]

FedHARP: Towards Multi-Station HRRP Recognition via Federated Prototype Learning against Non-IID Data

*Chen Wu (Xidian University); Yalin Li (Xidian University); Xinwei Deng (Xidian University); Haowei Yang (Xidian University); Jingyuan Si (Xidian University); Penghui Wang (Xidian University)**

Session P2-2: Tensor, Multi-Sensor & ISC Array Processing

Type: Poster

Time: July 15, 2026, 15:00-16:30

Location: Poster Area, board 9-16

Chairs: *Xianpeng Wang (Hainan University); Fangqing Wen (China Three Gorges University)*

[#27]

RIS-Assisted Hybrid Far-Field and Near-Field Source Localization

Zhuang Luo (Ningbo University); Zelong Yi (Ningbo University); Hua Chen (Ningbo University); Wei Liu (The Hong Kong Polytechnic University)*

[#189]

Signal Detection and Parameter Estimation Method in the Case of Noise Uncertainty

Yanan Ma (National Innovation Institute of Defense Technology Academy of Military Sciences); Jian Wang (National Innovation Institute of Defense Technology Academy of Military Sciences); Lu Cao (National Innovation Institute of Defense Technology Academy of Military Sciences); Ziang Zhao (National Innovation Institute of Defense Technology Academy of Military Sciences); Guangteng Fan (National Innovation Institute of Defense Technology Academy of Military Sciences); Mingjiang Ji (National Innovation Institute of Defense Technology Academy of Military Sciences)*

[#261]

Closed-Loop Graph Learning for Adaptive Sensor Selection in DOA Tracking

*Shuang Li (Tianjin University)**

[#31]

RIS-aided Scalable Electromagnetic Fluid Vector Antenna MIMO Radar for Target Localization

Jing Dai (Ningbo University); Hua Chen (Ningbo University); Ming Jin (Ningbo University)*

[#64]

RAM-ADMM based DoA Estimation for semi-passive IRS-aided sensing system

Yuan Wang (Hainan University); Xianpeng Wang (Hainan University); Yuehao Guo (Hainan University); Linqiang Wen (Hainan University)*

[#103]

A Root MUSIC Parameter Estimation Algorithm Based on Tensor Decomposition for FDA-MIMO Radar

*Wenshuai Wang (Hainan University)**

[#165]

Fast Radar Pulse Deinterleaving via Multi-Head Attention Broad Learning System

Longkun Kuang (National University of Defense Technology); Mingyang Du (National University of Defense Technology); Zhihui Li (National University of Defense Technology); Junpeng Shi (National University of Defense Technology); Xuan Chen (National University of Defense Technology)*

[#13]

Image-Based MF-ATI and PSMF-ATI with Array Radar GMTI Systems

Min Tian (Xidian University); Hang Xing (Xidian University); Yu Li (Xi'an Institute of Space Radio Technology); Chongdi Duan (Xi'an Institute of Space Radio Technology); Penghui Huang (Shanghai Jiao Tong University); Bin Liao (Shenzhen University)*

Session P2-3: Radar Imaging, Synthetic Aperture & Inverse Problems

Type: Poster

Time: July 15, 2026, 15:00-16:30

Location: Poster Area, board 17-23

Chairs: *Qing Wang (Tianjin University); Xueqian Wang (Tsinghua University)*

[#143]

Diffusion-Sparse Dual-Prior Extended Split Gibbs Sampling for SAR-GMTI

Hefei Gao (University of Science and Technology Beijing); Tianyao Huang (University of Science and Technology Beijing); Jie He (University of Science and Technology Beijing)*

[#155]

GNOMP Based Range and Velocity Estimation for Millimeter Wave Radar with Few-bit ADCs

Shuyi Di (Zhejiang University); Hansheng Zhang (Nanjing Marine Radar Institute, Nanjing, China); Ning Zhang (Nanjing Marine Radar Institute, Nanjing, China); Fengzhong Qu (Zhejiang

University); Jiang Zhu (Zhejiang University)*

[#201]

Gridless Synthetic Aperture Sonar Imaging Based on Atomic Norm Minimization

Zekai Lu (Northwestern Polytechnical University)*; Yifan Guo (Northwestern Polytechnical University); Tong Gu (Northwest A&F University); Yingmin Wang (Northwestern Polytechnical University)

[#225]

Plug-and-Play Latent Diffusion for Quantitative Ultrasound Imaging

Ruizhi Zhang (University of Electronic Science and Technology of China)*; Rui Guo (Weizmann Institute of Science); Yi Zhang (Weizmann Institute of Science); Yhonatan Kvich (Weizmann Institute of Science); Yonina Eldar (Weizmann Institute of Science)

[#17]

Decision-Level Fusion Based Micro-Motion Target Recognition for One-Bit Radar

GuoSen Zhao (Shenzhen University)*; Bailing Ren (Beijing Research Institute of Telemetry); Bin Zhang (Beijing Research Institute of Telemetry); Zhaoyang Sun (Beijing Research Institute of Telemetry); Hao Liu (Beijing Research Institute of Telemetry); Kaidi Song (Beijing Research Institute of Telemetry); Bo Zhao (Shenzhen University)

[#69]

SFQ-Det: A Structure–Frequency Coupled and Quality-Aware Detector for SAR Ship Detection

Zihao Wang (Yantai University)*; Jinwei Wang (Yantai University); Xinxin Wang (Yantai University); Zhuoran Cai (Yantai University)

[#154]

Analysis of Frequency Agile Radar using Block RIP

Shengyu Kang (University of Science and Technology Beijing); Tianyao Huang (University of Science and Technology Beijing)*; Jie He (University of Science and Technology Beijing); Tingting Wang (Qianyuan Laboratory); Letian Guo (Northwest Institute of Nuclear Technology)

Session P2-4: Remote Sensing, Vision Models & AI Data Fusion

Type: Poster

Time: July 15, 2026, 15:00-16:30

Location: Poster Area, board 24-29

Chairs: Gang Xu (Southeast University); Aimin Jiang (Hohai University)

[#39]

Adaptive Feature Gating Enhanced Stable Diffusion for Large-Scale Hyperspectral Image Super-Resolution

Zhentaoyou Zou (Shanghai Jiaotong University)*; Lin Chen (Stevens Institute of Technology); Jia Fu

(Shanghai Jiaotong University); Xue Jiang (Shanghai Jiaotong University)

[#90]

Point Cloud to Map Registration Under Rigid Transformations: Cramer-Rao Bound

Amit Efraim (Sami-Shamoon College of Engineering); Joseph Francos (Ben Gurion University);*

Louis Scharf (Colorado State University)

[#92]

Deep Automotive Radar Super-Resolution Based on Array Extrapolation

*Keke Kong (University of Electronic Science and Technology of China, China)**

[#100]

Learning-Aided Privacy-Utility-Oriented Adaptive Rate Vector Quantization

Eyal Fishel (Ben-Gurion University); Naor Bokobza (Ben-Gurion University); Ori Shlomi (Ben-

*Gurion University); Nir Shlezinger (Ben-Gurion University)**

[#153]

Latent Residual Diffusion for High-Quality LiDAR Point Cloud Completion

Chang Liu (Hohai University); Aimin Jiang (Hohai University); Ning Xu (Hohai University)*

[#275]

Comprehensively Understanding Remote Sensing Scene Segmentation via VFM and MLLM Collaboration

Ziyi Wang (The Chinese University of Hong Kong, Shenzhen); Man On Pun (Chinese University of Hong Kong, Shenzhen)*

Session P3-1: Reconfigurable Antennas, Secure Communications & UAV Networks

Type: Poster

Time: July 16, 2026, 15:00-16:30

Location: Poster Area, board 1-8

Chairs: *Peilan Wang (University of Electronic Science and Technology of China); Yongwei Huang (Guangdong Polytechnic Normal University)*

[#38]

On the Secrecy Performance of Pinching-Antenna Systems

Nianzu Li (Sun Yat-sen University); Weidong Mei (University of Electronic Science and Technology of China); Lipeng Zhu (Beijing Institute of Technology); Peiran Wu (Sun Yat-sen University); Boyu Ning (University of Electronic Science and Technology of China)*

[#110]

User Localization via Active Sensing with Electromagnetically Reconfigurable Antennas

Ruizhi Zhang (University of Electronic Science and Technology of China); Yuchen Zhang (King Abdullah University of Science and Technology (KAUST)); Ying Zhang (University of Electronic Science and Technology of China)*

[#152]

Ergodic Secrecy Rate of Movable Antenna-Aided MIMOME Systems with Statistical ECSI

Lei Xie (Southeast University); Guanxiong Shen (Southeast University); Guyue Li (Southeast University); Liquan Chen (Southeast University)*

[#169]

Zeroth-Order Blind Interference Suppression for Multi-RIS-Aided Wireless Systems

Binyao Ma (University of Electronic Science and Technology of China); Peilan Wang (University of Electronic Science and Technology of China); Bin Wang (Shenzhen Research Institute of Big Data); Jun Fang (University of Electronic Science and Technology of China)*

[#151]

Movable Antenna-Aided MIMO SWIPT Networks

Zihao Huang (Sun Yat-sen University); Nianzu Li (Sun Yat-sen University); Peiran Wu (Sun Yat-sen University)*

[#221]

GWO Based Computation Capacity Optimization for Pinching Antennas Assisted MEC Systems

Kuiyuan Chen (Beijing Institute of Technology); Shiwei Ren (Beijing Institute of Technology); Xiangnan Li (Beijing Institute of Technology)*

[#180]

Optimization of MIMO STEEP for Secure Communications over MIMOME Channels

*Dinglin Yu (University of California at Riverside); Yingbo Hua (University of California at Riverside)**

[#97]

Fluid Antenna-Enabled Physical Layer Security for UAV Communications

Wenchao Liu (Southern University of Science and Technology)*; Jun Wu (Southern University of Science and Technology); Xiaoye Jing (Dongguan University of Technology)

Session P3-2: Low-Altitude Intelligent Applications & Multi-Agent Systems

Type: Poster

Time: July 16, 2026, 15:00-16:30

Location: Poster Area, board 9-16

Chairs: Xiaoxiao Wu (Shenzhen University); Sheng Xu (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences)

[#63]

RWDSENN: Towards Robust Jamming Recognition in Low-Altitude Economy via Integrated Residual Learning and Wavelet Decomposition

Xinran Zhang (National University of Defense Technology)*

[#129]

On Mutual Information Maximization in Linear Sensing with Arbitrary Channel Priors

Ziyi Xu (Chinese University of Hong Kong)*; Shuoyao Wang (Shenzhen University); Ying-Jun Zhang (Chinese University of Hong Kong)

[#170]

Boosting RF Fingerprint Identification with a Pre-trained Time-Series Encoder

Zheng Xiao (Shenzhen University)*; Hairong Zhou (Shenzhen University); Xiaoxiao Wu (Shenzhen University)

[#214]

Infrared Small Moving Target Detection via Motion Constrained Robust Principal Component Analysis

Wenbin Wang (Academy of Mathematics and Systems Science)*; Mingjie Shao (Academy of Mathematics and Systems Science); Wenchao Xue (Academy of Mathematics and Systems Science); Hui Xie (Shanghai Institute of Technical Physics); Hanbin Sun (Shanghai Institute of Technical Physics); Yanlong Zhao (Academy of Mathematics and Systems Science)

[#222]

LLM-Agent-Based Energy-Neutral Random Access for Low-Altitude UAV Localization

Erchao Zhu (Shenzhen University); Jiedan Tan (Shenzhen University); Fang Liu (Shenzhen University)*; Jingwen Tong (Shenzhen University); Taotao Wang (Shenzhen University); Shengli Zhang (Shenzhen University)

[#104]

A Unified Graph-Mamba Framework for Cooperative Autonomous Driving in Mixed Traffic

*Jia Liu (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences)**

[#137]

Multi-Agent Reinforcement Learning for Joint Node Selection and Power Allocation in Cognitive Tracking Radar Networks

Zechong Wang (University of Pisa); Maria Sabrina Greco (University of Pisa); Fulvio Gini (University of Pisa)*

[#233]

Coalition Game of Jammer Swarm for Combating Multifunction Radar

*Kui Xiong (University of Electronic Science and Technology of China)**

Session P3-3: Tracking, Sensor Networks & Multi-Agent Systems

Type: Poster

Time: July 16, 2026, 15:00-16:30

Location: Poster Area, board 17-23

Chairs: *Jibin Zheng (Xidian University); Chaoqun Yang (Southeast University)*

[#263]

Tensor for Target Tracking: A Tucker Decomposition Based Method

Tianqi Hu (Southeast University); Chaoqun Yang (Southeast University); Chengwei Zhou (Zhejiang University); Lin Gao (University of Electronic Science and Technology of China)*

[#267]

One-bit DOA estimation based on generalised expectation maximisation sparse Bayesian learning

*Songmao Du (University of Electronic Science and Technology of China)**

[#271]

Coherent DOAs estimation via multi-task network enhanced sparse variational Bayesian method

*Liu Yijia (University of Electronic Science and Technology of China)**

[#273]

ASAP: An Azimuth-Priority Strip-Based Search Approach to Planar Microphone Array DOA Estimation in 3D

Ming Huang (Southern University of Science and Technology); Shuting Xu (Southern University of Science and Technology); Leying Yang (Southern University of Science and Technology); Huanzhang Hu (Southern University of Science and Technology); Yujie Zhang (Southern University of Science and Technology); Jiang Wang (Institute of Science Tokyo, Japan); Yu Liu (Southern University of Science and Technology); Hao Zhao (Southern University of Science and Technology)

*Technology); He Kong (Southern University of Science and Technology)**

[#24]

Product Fusion Based Moving Target Detection Metric with Distributed SAR Systems
*Penghui He (Hangzhou Institution of Technology, Xidian University)**

[#206]

Distributed Extended Object Tracking Algorithm Based on Contour Measurement Model
Kaidi Yang (University of Electronic Science and Technology of China); Wei Xia (University of Electronic Science and Technology of China); Zihao Song (Nanjing University of Information Science and Technology)*

[#5]

A Novel Sidelobe Suppression Method for Multi-Target Sparse Random Array Beamforming
Ziyu Han (National University of Defense Technology); Chongyi Fan (National University of Defense Technology); Dong Feng (National University of Defense Technology); Xiaotao Huang (National University of Defense Technology)*

Session P3-4: Multichannel Detection, Waveform Diversity & Robust Sensor Processing

Type: Poster

Time: July 16, 2026, 15:00-16:30

Location: Poster Area, board 24-30

Chairs: *Peng Xiao (Sun Yat-sen University); Jie Li (Nanjing University of Aeronautics and Astronautics)*

[#120]

A Reliability-Constrained Time Delay Estimation Method for Multi-Sensor Array Systems
*Pengcheng Gong (Wuhan Institute of Technology)**

[#167]

Learning to Sense: Uncertainty-Aware Active Sensing for Ocean Physical Fields via Bayesian Tensor Completion

Zhongtao Chen (The University of Hong Kong); Bingyang Cheng (The University of Hong Kong); Wenqiang Pu (The Chinese University of Hong Kong, Shenzhen); Lei Cheng (Zhejiang University); Yik-Chung Wu (The University of Hong Kong)*

[#105]

Parametric Noise Coherence Matrix Estimation through Neural SNR Regression for MVDR Beamforming

Chunrui Zhao (School of Electronic Information, Wuhan University); Yujie Zhu (School of Electronic Information, Wuhan University); Jilu Jin (CIAIC, Northwestern Polytechnical*

University); Xueqin Luo (CIAIC, Northwestern Polytechnical University); Gongping Huang (School of Electronic Information, Wuhan University); Jingdong Chen (Wuhan University); Jacob Benesty (INRS-EMT, University of Quebec)

[#55]

Gradient and Durbin Tests for Target Detection in Structural Nonhomogeneity Arising from the Generalized Eigenrelation

Mengru Sun (Qingdao Branch, Institute of Acoustic, Chinese Academy of Sciences); Weijian Liu (Wuhan Electronic Information Institute); Chengpeng Hao (Institute of Acoustics, Chinese Academy of Sciences); Kefei Li (Qingdao Branch, Institute of Acoustic, Chinese Academy of Sciences)*

[#139]

Adaptive Detector in Heterogeneous Clutter Based on Complex-Valued Convolutional Attention Network

Wenze Sun (Beijing University of Posts and Telecommunications); Zeyu Wang (Beijing University of Posts and Telecommunications)*

[#158]

Performance Bound Analysis of Compressed Sensing for Airborne Random PRI Radar

Zekai Wang (University of Science and Technology Beijing); Tianyao Huang (University of Science and Technology Beijing); Jie He (University of Science and Technology Beijing); Xueqian Wang (Tsinghua University); Gang Li (Tsinghua University)*

[#130]

Online Bayesian Learning Approach for Urban Roadbed Void Detection Using Vehicle-Induced Distributed Acoustic Sensing Signals

Qisong Wu (Southeast University); ChenGuang Zheng (Southeast University); Qiwei Liu (Southeast University); Dongyu Liu (Southeast University); Jinzhao Li (Southeast University); Yong Wang (Southeast University)*
